DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 18-28 drawn to a keyed filler panel assembly, classified in class 174, subclass 35R.
 - II. Claims 11-17 and 29-38, drawn to a method to simplify removable coupling, classified in class 264, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, handle can be made by casting.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims of Groups I with:

Species a drawn to device of figure 2

species b drawn to device of figure 3

Species c drawn to device of figure 6

Art Unit: 2831

Species d drawn to device of figure 7

Species e drawn to device of figure 9A

species f drawn to device of figure 9B

Species g drawn to device of figure 9C

Species h drawn to device of figure 9D

Species i drawn to device of figure 10

species j drawn to device of figure 11

(species a-j above with locating element of:)

Species aa drawn to device of figure 4

Species bb drawn to device of figure 5.

Claims of Groups II with:

Species 1A drawn to method steps of figure 8

Species 1B drawn to method steps of figure 12

(species 1A-1B above with :)

Species a drawn to device of figure 2

species b drawn to device of figure 3

Species c drawn to device of figure 6

Species d drawn to device of figure 7

Species e drawn to device of figure 9A

species f drawn to device of figure 9B

Species g drawn to device of figure 9C

Species h drawn to device of figure 9D

Species i drawn to device of figure 10

species j drawn to device of figure 11

(species a-j above with locating element of:)

Species aa drawn to device of figure 4

Species bb drawn to device of figure 5

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. A telephone call was not made to request an oral election to the above restriction requirement due to its complexity.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinhee J Lee whose telephone number is 703-306-0154. The examiner can normally be reached on M, T, Th and F at 6:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean A Reichard can be reached on 703-308-3682. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
